

MNF files in alphabetical order

In the first lot of MNF boxes the titles were in good order, but suddenly became very jumbled up. This alphabetical sequence is useful as it shows all the files on a subject regardless of where they have been placed in the boxes. This list is also useful when a file goes astray and it is not clear which box it came from. **It is best used in conjunction with the subject index which indicates related files and has more comprehensive references.**

N.B. Within a number range the titles are filed according to the numerical divisions in that range, not alphabetically. Unnumbered files are therefore likely to come at the end of a sequence (or at the beginning if older).

Look under both S.A... and South African... when researching.

The Storage Case file titles have been added although their source is uncertain [files placed in an unrelated part of the Archives]. They are denoted SC.

NB, see MF's comment on the filing system at Rand Mines in the H. Eckstein inventory, p. viii-xi
