

the FERGUSON MOWER

- ◆ GREATER ECONOMY
- ◆ QUICK TURNING
- ◆ EASY AND SAFE

The knife speed of the Ferguson Mower is considerably above average and is thus able to deal efficiently with short grass being used for silage. A break-away mechanism in the pull bar protects the cutter bar from damage when obstructions are encountered. When turning and manoeuvring, the Hydraulic Lift is used. A mounted Mower which can be attached and detached like any other implement.

There's Wealth in the Soil!

The farmer who uses good farming methods increases the yield of his land many times—growing more food for his family and good crops for market. This comes when

the soil is kept healthy by contour ploughing . . . by properly rotating crops . . . and by building up fertility of the soil with "Kynoch" fertilizers.

KYNOCH LIMITED
DURBAN

MPHATLALATSANE 1-10-54

Do you want WASTE? ..

..OR WEALTH?!

Burning the veld at the wrong time, cutting trees to stumps and growing crops between the roots, continuous planting of the same crops each year . . . these things kill the soil — and no farmer can grow crops on dead soil.

But the yield of the land can be increased many times by contour ploughing, by proper crop rotation and by keeping the soil healthy and fertile with the use of "Kynoch" fertilizers.
